

ERN Support and Training programme- WP17- EJP RD

Report Workshop “CDH1 related hereditary diffuse type gastric cancer: from preventive total gastrectomy to optimal endoscopic surveillance”

Date/Venue/Format

October 12 and October 13 2023

Radboudumc Nijmegen, the Netherlands

Lectures/ oral abstract presentations / case reports / guided tours / quiz

Numbers (participants, speakers, ERNs represented, patient representatives)

Participants 29

Speakers 8

ERN-represented 24

(ERN-Genturis 19 (16+3 speakers) , Endo-ERN 4, ERN-EpiCARE 1, ERN-RND 1, ERN EURACAN 2, ERN ITHACA 1, MetabERN 1, ERN PaedCan 1, ERN RITA 1)

Patient representatives 3

Analysis of the workshop satisfaction survey

The workshop was rated very good (25% of participants) to excellent (75% of participants). The usefulness of the given content was highly according to 85% of the participants. The training contents were just right for 100% of the participants.

In future a face-to-face meeting is preferred by most of the participants.

CME-points

Most participants are neutral concerning CME-points. Reason might be that not all EU countries practice equal rules.

For me as organizer CME-points would help to make the workshop even more attractive. As a participant I would certainly appreciate receiving CME-points automatically.

2-3 participants' testimonials

"The workshop allowed to interact satisfactorily"

"There was enough time for Q&A"

"The workshop allowed me to gain better understanding in the topic"

"There were appropriate learning objectives set"

The learning objectives have been met"

"The workshop gave insight in de patients perspective"

"The workshop addressed all the controversies in managing HDGC"

If applicable a main result of the workshop

In an accessible atmosphere, this workshop handled the current knowledge of HDGC, gave insights in novel scientific developments and suggestion for translation of this in daily clinical care.

Also the patients' perspective was taken seriously.

Overall it was rated very well by participants, patients and lecturers.

It was an honor to have the opportunity to organize the first European workshop on HDGC. Hopefully we will have the chance to repeat it in 2-3 years. THANKS

Conclusions, lessons learned, best practice to keep in mind.

- Improve catering (pastries with coffee)
- Add breast cancer risk
